VOLUNTARY EMISSIONS SERVICE CAMPAIGN

VEHICLE EMISSION CONTROL INFORMATION (VECI) LABEL REPLACEMENT (SC222)

SUBJECT:

This bulletin provides information to replace the Vehicle Emission Control Information (VECI) label on some 2020MY Sportage (QL) vehicles with 2.0L T-GDI engines produced from December 19, 2018 through May 13, 2020. An incorrect VECI label was installed during production of these vehicles. The VECI label is extremely important when performing maintenance, emissions inspection, or ordering engine and engine management related parts. It also contains the code that tells a testing facility which test to perform to ensure the vehicle is tested to the correct emission standard. The U.S. Environmental Protection Agency and California Air Resources Board consider the under hood VECI label an integral part of state emission testing. If the VECI label is incorrect, the vehicle may fail the emission testing, even if it meets applicable emissions standards. Follow the procedure outlined in this publication to affix the correct VECI label. Before conducting the procedure, verify that the vehicle is included in the list of affected VINs.

**VEHICLE EMISSION CONTROL INFORMATION (VECI)
LABEL REPLACEMENT (SC222)**

Replacement Procedure:

1. Open the hood and locate the existing Vehicle Emission Control Information (VECI) label.

2. Select the new VECI label with the correct EVAP information for 2WD or 4WD, as shown below.

3. Clean the surface of the incorrect VECI label with an alcohol wipe or an equivalent cleaner.

NOTICE

Failure to clean the surface will prevent the new label from adhering properly.

4. Carefully affix the new provided VECI label over the old VECI label, ensuring complete coverage of the old label with the new one.

IMPORTANT

Ensure the correct label (2WD or 4WD) is affixed to the vehicle. Refer to Parts Information for proper part number.
