

TECHNICAL SERVICE BULLETIN

Front Luggage Compartment Closing Effort

22-2130

12 April 2022

This bulletin supersedes 21-2189.

Model:

Ford 2021-2022 Mustang Mach-E

Summary

This article supersedes TSB 21-2189 to update the vehicle model years affected.

Issue: Some 2021-2022 Mustang Mach-E vehicles may exhibit a concern where the front luggage compartment hood is hard to close due to air becoming trapped in the front luggage compartment while closing the hood, increasing the closing effort.

Action: Follow the Service Procedure to correct the condition on vehicles that meet all of the following criteria:

- 2021-2022 Mustang Mach-E
- Front luggage closing efforts

Warranty Status: Information Only – Not Warrantable.

Repair/Claim Coding

Causal Part:	IN
Condition Code:	42

Service Procedure

To properly close the front luggage compartment hood, apply closing force as the hood is lowered. Verify the hood is fully closed. Allowing the hood to close on its own weight may not be enough effort to properly latch the front luggage compartment hood. No additional adjustments are required for the hood/latch.

NOTE: The information in Technical Service Bulletins is intended for use by trained, professional technicians with the knowledge, tools, and equipment to do the job properly and safely. It informs these technicians of conditions that may occur on some vehicles, or provides information that could assist in proper vehicle service. The procedures should not be performed by "do-it-yourselfers". Do not assume that a condition described affects your car or truck. Contact a Ford or Lincoln dealership to determine whether the Bulletin applies to your vehicle. Warranty Policy and Extended Service Plan documentation determine Warranty and/or Extended Service Plan coverage unless stated otherwise in the TSB article. The information in this Technical Service Bulletin (TSB) was current at the time of printing. Ford Motor Company reserves the right to supersede this information with updates. The most recent information is available through Ford Motor Company's on-line technical resources.
