## 47 Assessing rear brake caliper leaks - A4, A5

47 22 11 2067117/1 May 20, 2022.

Model(s)	Year	VIN Range	Vehicle-Specific Equipment
A4 allroad, A4, S4, A5 Cabriolet, A5, A5 Sportback, S5 Cabriolet, S5, and S5 Sportback	2020 – 2022	All	Not Applicable
RS 5, and RS 5 Sportback	2021 – 2022		

## Condition

### Customer states:

- Traces of moisture, contamination, and/or a warning lamp indicate that there is a leak in the brake system.

### Workshop findings:

- Moisture is identified on one of the rear brake calipers.

## Technical Background

Assembly fluid was used in the supplier's production process when the components were assembled.

The moisture that is visible does not necessarily indicate that there is a leak at the rear brake caliper.

It may simply be residue from assembly fluid used during production.

---

## Production Solution

Improvements starting from May 2022.

## Service

Proceed as follows:

- Clean the area and check whether there is moisture underneath the protective sleeve – the picture below shows a dry state (Figure 1).
- If there is no moisture in this area, reassess the complaint and continue evaluating the rest of the brake system.
