Service Campaign 468

MC20 - DCTM Adaptive Parameter Writing

DATE: February 17, 2022

Maserati MC20 (M240) cars in the attached list are involved in a Service Campaign to update the DCTM adaptive parameters.

The update is needed to correct the values downloaded on a limited number of cars. to help prevent the erroneous lighting of the gearbox and/or poor performance warning lights in the instrument cluster.

If you have any questions, contact your Regional AfterSales Manager or the Technical Support Helpdesk.

Operational Procedure 1

1. Check in ModisCS+ to see if the car is involved in this campaign and whether the campaign has not been previously performed.
2. Make sure that the engine is off.
3. With MD EVO, run the command *DCTM => Replace Gearbox*

This procedure is only needed to write the new serial number. The gearbox does not have to be replaced.

4. During the procedure, the MD EVO will display the following prompt:

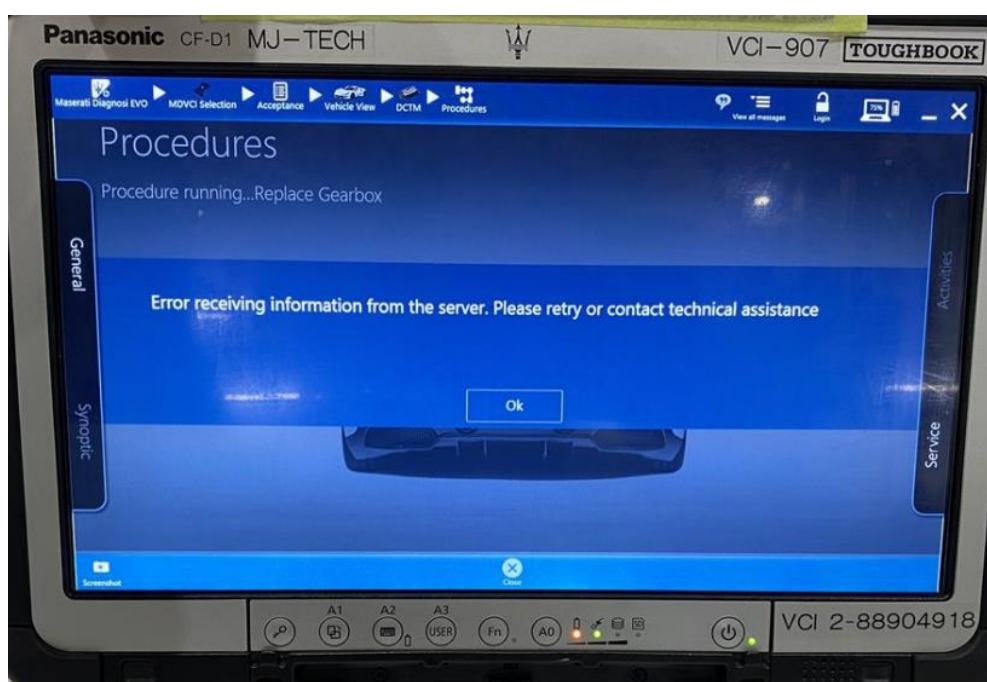

"Frame the Data Matrix code of the gearbox, using the MD EVO camera or press Manual Input to enter the gearbox serial number manually. The gearbox serial number is a 30-digit value to be entered without spaces or dashes" => Select Manual Input

5. Write down the serial number associated with the VIN, as shown in the attached VIN List.
