AJ20-P4,P6 AJ133G2 DMTL MIL

Customer Voice:

- Customer will experience a MIL.

Technical Description:

- PCM will show P2402 and/or P2404 DTCs

Status:

- Check & record whether an air filter cap (red) is fitted.
- Check air filter condition for any signs of excess contamination/dust or water ingress.
- Check whether pipes to/from DMTL are showing any kinks or deformation.

Engineering would like an EPQR is raised if you have found any of the above

- Please include

- Detailed photos of the DMTL unit before replacement
- Is there any dirt or debris on the internal surface
- Information as to whether the DMTL unit smells of Fuel.
- Does any water or fuel come out of the removed DMTL unit

- Part to be saved so that engineering can arrange PRR.

Refer to SSM 75723
