<b>Title</b>	22MY 8HP45/70 8-speed transmission selector lever displays 'N' (Neutral) after auto stop/start event
<b>Category</b>	Driveline
<b>Last modified</b>	24-May-2022 00:00:00
<b>Symptom</b>	504000 Other Automatic Transmission Concerns

**Content**Issue:

Following an auto stop/start event the gear selector displays 'N' (Neutral) without any transmission selector operation. "D" (Drive) selectable only after 'P' (Park) or 'R' (Reverse) is selected.

No transmission diagnostic trouble codes are logged. Transmission has initiated fail safe mode in error.

Cause:

Software calibration issue within the Transmission Control Module (TCM).

Action:

Update the Transmission Control Module to the latest level of software.

If an update is not shown it indicates that the Transmission Control Module is at the latest software level and doesn't require updating.

Thank you in advance for your assistance with this matter.
