

Technical Service Bulletin

42 Noises from shock absorbers/shock absorber mountings on the rear axle

42 22 49 2064019/2 June 9, 2022. Supersedes Technical Service Bulletin Group 42 number 21-45 dated July 15, 2021, for reasons listed below.

Model(s)	Year	VIN Range	Vehicle-Specific Equipment
e-tron quattro	2019 2021 – 2023	All	Not Applicable
e-tron Sportback quattro	2020 – 2023		

Condition

REVISION HISTORY		
Revision	Date	Purpose
2	-	Revised <i>header</i> (Added Model Year)
1	07/15/2021	Initial publication

Customer states:

- There are rumbling/rattling noises from the rear axle area when driving over irregularities in the road.

Workshop findings:

- The concern can be reproduced between 5 and 30 mph at outside temperatures below 32 °F.
- The noises come from the area of the rear shock absorbers/from the shock absorber mountings.

Technical Service Bulletin

Technical Background

At temperatures below 32 °F, frozen water/dirt above the shock absorber mountings causes restrictions to the operation of the shock absorber mounting.

Note:

- The concern described depends on the temperature, as it is caused by ice or frozen dirt above the shock absorber mounting.
- A simple check to verify the customer's concern can be done by carefully heating up the shock absorber mounting and reevaluating the vehicle.

Production Solution

Not applicable.

Service

1. Remove both rear shock absorbers according to Elsa at Repair Manual, *Chassis >> Suspension, Steering, Wheels >> 42 Rear Suspension >> Suspension Strut, Shock Absorber, Spring*.
2. Replace the shock absorber mountings on both sides (Figure 1, picture 1 with item 6).

Technical Service Bulletin

Figure 1. Example of Butyl sealing cord application and component location.

3. Install the new mountings, use approx. 10 in of butyl sealing cord on each side of the vehicle to make a seal between the protective cap (Figure 1, picture 1 with item 4) and shock absorber mounting (Figure 1, picture 1 with item 6) (Figure 1, picture 2 and 3).
4. Before working with the butyl sealing cord, make sure that the sealing surfaces of the new shock absorber mounting and the corresponding shock-absorber protective cap are clean and dry. The shock absorber cap (item 4) can be re-used.

Warranty

Claim Type:	<ul style="list-style-type: none">• 110 up to 48 Months/50,000 Miles.• If the vehicle is outside any warranty, this Technical Service Bulletin is informational only.
