Customer states:

- Air suspension malfunction warning in the instrument cluster (symbol for the air spring).

Workshop findings:

One of the following DTCs is stored in the suspension control module, J1135 (address word 0074):

- DTC C1260F0 (compressor control unit for adaptive suspension, no communication) with symptom code 262400.

Or

- DTC U112100 (data bus, missing message) with symptom code 262400.

Technical Background

Not applicable.

Production Solution

Not applicable.

Service

Technical Service Bulletin

Check for irregularities in wiring and connector contacts between the suspension control module, J775 (address word 0074) and the compressor control module, J1135 (address word 0074), if there are no problems found then proceed as follows:

- If the DTC is passive/sporadic, delete the DTC and release the vehicle.
- If the DTC is active/static, replace compressor control unit J1135 according to Elsa at Repair Manual, *Chassis >> Suspension, Wheels, Steering >> 43 Self Levelling Suspension >> Air Suspension >> Level Control System Compressor Electronics J1135, Removing and Installing.*
