Bendix Side Collision Mitigation Radar Shortage

Section

Parts Shortage - S

Subject

Bendix Side Collision Mitigation Radar Shortage

Whats New Abstract

Due to a global chip shortage, certain chassis will be shipped without the Bendix side object detection radar modules and A-pillar displays. Refer to Sales Bulletin [TE2680](#) for details.

Condition

Due to a shortage, specific chassis were built without Bendix side collision mitigation radar modules and A-pillar displays.

Chassis Affected

Model Year 2023 T180, T270, T280, T370, T380, T480, T680, T880, and W990 chassis built from 05/23/2022 through current production with Bendix Side Object Detection specified on the vehicle sales order.

Refer to Sales Bulletin [TE2680](#) for specific build date and configuration information.

Action

Info Only

This bulletin is to inform dealers about a Bendix side collision mitigation radar system shortage. Dealers will be notified when parts become available.

Refer to Sales Bulletin [TE2680](#) for more information.

Warranty

No Warranty – Info Only

Parts

When the supply is re-established, side collision mitigation radar system kits will be made available to purchase for chassis shipped with a “pre-install” code.

Background

Due to a supplier shortage, certain chassis will be built and shipped without Bendix side collision mitigation radar modules and A-pillar displays installed. Affected Chassis' Sales codes Orders will reflect a “pre-install” condition. The radar mounting brackets, fairing cutouts, and associated wiring harnesses will be present on these chassis. Dealers will be notified when the radar modules and A-pillar displays are available.
