Indian Motorcycle Fork Oil, Type I and Type II

**MSD Post Content**

There are two different fork oils for Indian Motorcycle products today. Type I (P/N 2208093) is for all Indian Motorcycles except Challenger/Pursuit. Type II (P/N 2884244) is for all Challenger/Pursuit models. Type II (P/N 2884244) is the oil the Challenger/Pursuit forks are shipped with and is the preferred oil for those models. Type I (P/N 2208093) has been tested in the Challenger application and can be used if 2884244 is not available. The two different oils should not be mix. If changing oil types perform a complete service of the forks and wipe down the components to minimize the amount of previous type oil left in the forks
