2021 Ontour

job #1
complaint:
diag inverter will flash 2 times red then 1 time green and stop
cause:
cust. says that inverter is not working
correction:
tested incoming power from battery at 13.5 volt. shore power coming in and going through inverter but no inverter power up on screen or unit powering on tested internal fuses all tested good. techs spoke with ryan have the approval to instal new xantrax inverter. 3.0 for diag and install. please send me an auth #

The time approved is 3.0 hours (diagnose + install new inverter).
