

Rpod window repairs (for leaking window):

Remove inside day / night shade, window, rock guard, side rails, to lift the skin on the coach.

Need to remove to the top of the curve on the coach.

Lift and brace the outer skin as needed and inspect rafters for any damage.

Once the skin is lifted and supported, you will remove insulation and replace if it is water damaged.

Treat rafters with mold inhibitor product or 3/1 bleach solution. Let dry out before replacing them.

Replace any severely damaged rafters, insulation, wall panels and trim as needed. Photos of the rafters are needed if they are damaged.

After the wall panels are replaced. Reinstall rafters, and insulation, reinstall skin and secure, reinstall rock guard and secure, and reinstall window and seal as needed.

Water test for leaks – repair as needed.
