
SSM 51010 2020 Corsair – Active Park Assist Unavailable Message Displayed In The Message Center

Some 2020 Corsair vehicles may exhibit an active park assist unavailable message displayed in the message center when the vehicle is placed into reverse (R). This may be due to the configuration of the anti-lock brake system (ABS) module. To correct this condition, run the ABS configuration app and then the ABS-Calibration app using Ford Diagnosis and Repair System (FDRS). Perform a road test above 10mph for at least 5 minutes and re-evaluate the concern. For claiming, use causal part 2C219 and applicable labor operations in Section 10 of the Service Labor Time Standards (SLTS) Manual.
