

WMJ6 Workshop campaign – Re-programming and/or coding seat control unit

WMJ6 Workshop campaign - Re-programming and/or coding seat control unit

Update 1/18/2022

Please be advised that **WMJ6 re-programming repairs can begin immediately**. The TI is available in PCSS and the [AfterSales Document Database](#).

Overview

Due to a communication error between the PIWIS Tester and the seat control unit (driver seat, passenger seat, rear seats) there is a possibility that the seat control unit may no longer be switched to idle state after performing diagnostics during a workshop visit.

If this happens, there will be an increased closed-circuit current load and the 12V vehicle electrical system battery will discharge while the vehicle is parked.

For this reason, the seat control unit (driver seat, passenger seat, rear seats) on the affected vehicles must be re-programmed and coded using a corrected data record.

Model type	Panamera (971) Cayenne (9YA/9YB) 911 (992)
Model year	2017 - 2022
Number	35,656

Required software

PIWIS Tester 3 test software version	40.650.030 (or higher)

Warranty processing

Validity:

This workshop campaign will be carried out up to November 5th, 2026 and will be closed on that date.

Please note that warranty claims can only be processed before this date.

Scope 1: Re-programming and/or coding seat control unit

- **Panamera (971)**

Damage code	WMJ6 66 000
Repair code	1
Working time	35 TU

Scope 2: Re-programming and/or coding seat control unit

- **Cayenne (9YA/9YB)**

Damage code	WMJ6 66 000
Repair code	1
Working time	29 TU

Scope 3: Re-programming and/or coding seat control unit

- **911 (992)**

Damage code	WMJ6 66 000
Repair code	1
Working time	32 TU

WMJ6 Workshop campaign – Re-programming and/or coding seat control unit

Please enter the campaign that was carried out in the Warranty and Maintenance booklet for the vehicle.
