TECHNICAL SERVICE BULLETIN

SUBJECT: SERVICE REMINDER SETTING RESET PROCEDURE

This bulletin has been revised to include additional information. New/revised sections of this bulletin are indicated by a black bar in the margin area.

This bulletin provides the procedure to turn OFF the service reminder lamp, at the first service interval reminder alert that will display on the instrument cluster. The KDS is required to change the setting from 'Workshop' to 'Customer Mode'. During the KVID PDI, the first service intervals are set as follows:

2019-2021MY:

- 7,500 (12 months) on Non-Turbo Engines + EV
- 6,000 (12 Months) on Turbo Engines

2022MY~:

- 8,000 (12 months) on Non-Turbo Engines + EV
- 8,000 (6 Months) on Turbo Engines

This function can also be used if the customer decides they would like to set the service interval at Severe vs Normal schedule that was set during the PDI. Dealers and customers should always set the service interval as a reminder when the oil service and/or other maintenance are performed. Follow the procedure listed in this TSB to properly set the cluster to customer mode.

Note: This bulletin only applies to 2019MY and later Kia vehicles.

SERVICE REMINDER SETTING RESET PROCEDURE

Service Reminder Setting Reset Procedure:

1. Connect the VCI-II to the OBD-II connector, located under the driver's side of the instrument panel.

The ECU upgrade function on KDS operates wirelessly. It is not necessary to perform the upgrade via USB cable.

2. With the ignition **ON**, turn ON the KDS tablet. Select **'KDS'** from the home screen.

Confirm communication with VCI (A) and then configure the vehicle (B) using the 'AUTO VIN' (C) feature.

4. Select Cluster Module, then Service Reminder Setting (D) in 'S/W Management' menu.
