FOTA TBM SW Update v4.34 Dealer Notice

DATE: JULY 14 2022

We would like to inform you that a new FOTA (Firmware Over The Air) Update will be delivered directly to the Final Customer for all Maserati Sedans and Levante's to update the TBM (Telematic Box Module) software up to the latest version 4.34.

This update is a general improvement of the component. It cures a potential lack of communication between Maserati vehicles and the Mobile App that may not be correctly updated. Some data such as health status or last update data may not update to the last status correctly.

No campaign will be opened for this update and no action is required by the Dealer. The update will be performed directly to the final customer vehicle, regardless of the commercial status of each VIN.

If you have any questions, contact your Regional AfterSales Manager (RAM) or the Technical Support Helpdesk. (Maseratitechsupport@maserati.com)

Thank You for your continued support and cooperation.
