

Coalescing Style Air Dryer

M-561-002

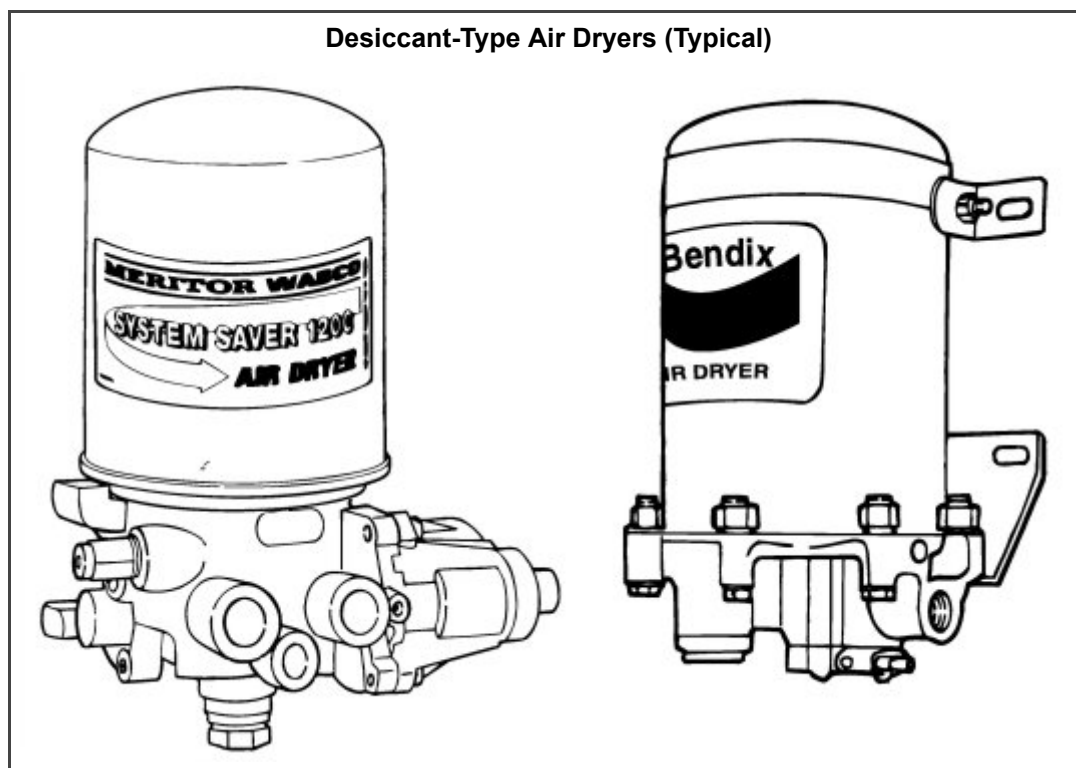

(February 2009)

Valid for

ALL CXU, CHU, GU, TD, MRU, LEU

Case description

Effective mid-September 2008, all MACK chassis are equipped with air dryers which utilize an oil coalescing desiccant cartridge which removes atomized oil and other particulate matter from the air system. The oil coalescing desiccant cartridge must be changed yearly. Refer to the specific air dryer service literature for detailed information.

Note: Does not apply to Mack Trucks Australia.

Required parts

The replacement cartridge part numbers are as follows:

Cartridge part number	Dryer Model
85115878	Bendix® AD9
85115876	Bendix® ADIP
85110799	ArvinMeritor™/Wabco 1200 Series
85115361	ArvinMeritor™/Wabco 1800 Series
85110799	ArvinMeritor™/Wabco Twin

Note: It is strongly recommended that the cartridge be replaced on a yearly basis with a new coalescing-type filter cartridge.
