Service Bulletin

Service Bulletin - Technisches Rundschreiben - Circulaire Technique - Circular Tecnica

Date: **2nd September 2022**

Subject: **Clutch cable**

Product: **F3 800 ROSSO\F3 800 RR EURO 5**
VIN list attached at the end of the document

As a result of continuous monitoring of our product quality, it has been found that on the above specimens it is necessary to replace the clutch cable with an optimised component part no. 8000D1068.

NOTE: Priority for intervention must be given to VINs in circulation and vehicles being delivered to the final customer.

Element to be modified/added	Type of operation to be performed	Reason for update
Clutch cable	Clutch cable replacement with optimised unit part no. 8000D1068	Improved heat resistance

WARRANTY CLAIM AND LABOUR REFUND (STEP 1)

To obtain the refund for labour, a Warranty claim must be submitted using the following instructions:

- Warranty type = 3 options available:
 - New motorbikes in stock NOT YET REGISTERED = **GX**
 - Motorcycles sold with activated warranty = **GS**
 - Motorcycles sold with expired warranty = **GS**
- Special warranty number: **2854** (to be used for all warranty types)
- Operation code for labour refund: **E113** and enter the time of **0.20 h**
- Problem code: **099**
- Problem date: **warranty claim insertion date**
- It is mandatory to include the reference "**CT 307**" in the notes of the warranty claim.
- Spare Part: part no. **8000D1068** Quantity 1 pc.

WARRANTY CLAIM AND LABOUR REFUND (STEP 2)

When the Warranty claim (see step 1) is validated by MV Agusta Technical Service, the process must be completed by entering the repair date.

Please note that the insertion of the date of repair in the Warranty claim represents certification that the motorbike has been repaired by the dealer and allows also the payment of labour for the work carried out.

NOTE: We remind you that according to the new functions and procedures of warranty management, the insertion of the date of repair is fundamental and mandatory as per technical communication no. 004/17.

Equipment required for operations

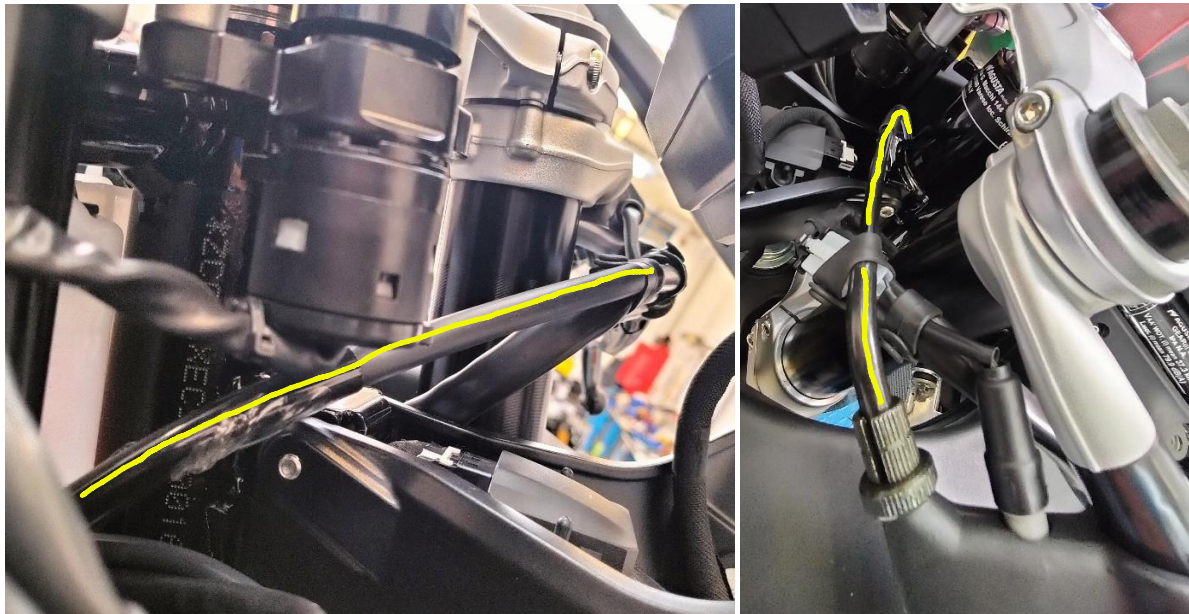

- Allen key 4 mm
- N °2 Wrenches 12 mm
- Torque spanner 0 - 10 Nm

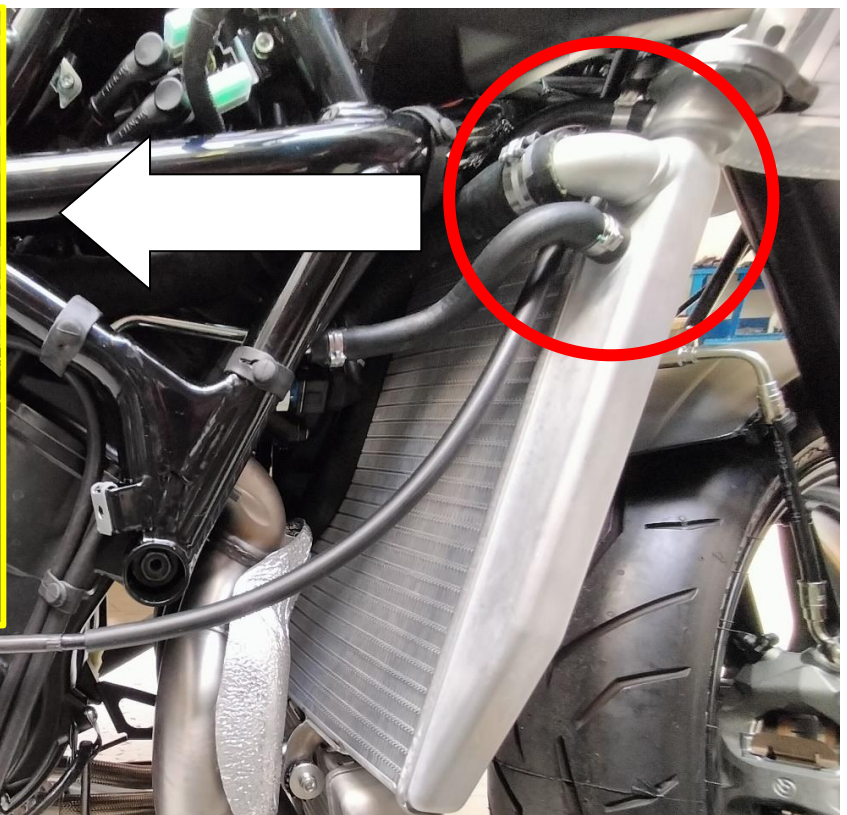

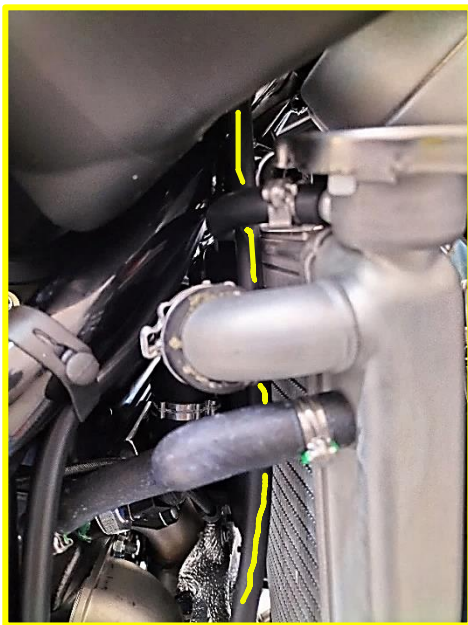

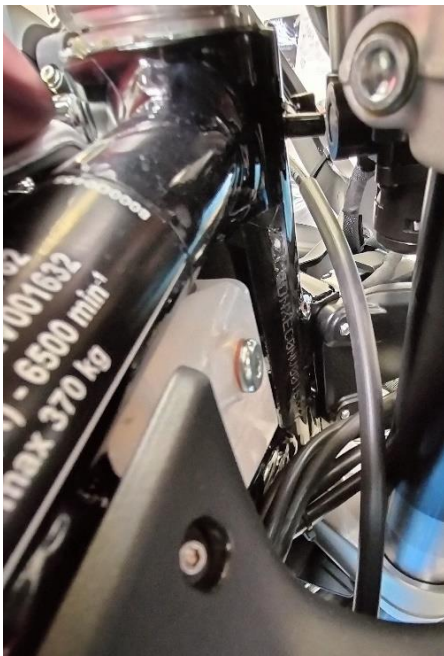

INTERVENTION PROCEDURE:

NOTE: if the motorbike is already equipped with cable code 8000D1068 NO further operation WILL BE NECESSARY.

- Remove the right-hand fairing.
- loosen the two nuts that fix the clutch cable to the cable support plate part no. 8000B4678.
- Release the clutch cable from the clutch release shaft part no. 8000B8987.
- Remove the clutch switch connector away from the cable by removing the two rubber clamps present.
- Remove the cable from the housing on clutch switch part no. 8000B8974.
- Pull the clutch cable out, paying attention to its routing.
- **NOTE: The clutch cable removed MUST NOT BE USED AGAIN.**
- Take the new clutch cable part no. **8000D1068** and place it on the vehicle, paying attention to its routing; check the correct routing by referring to the pictures below:

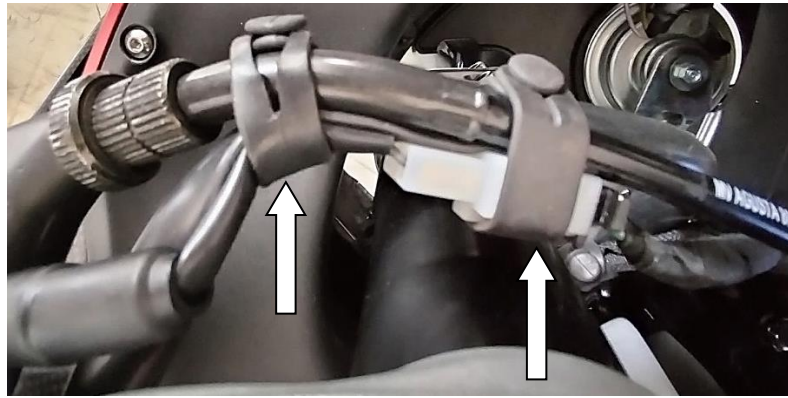

- Tighten the two nuts securing the clutch cable to the cable support plate part no. 8000B4678 to a torque of 10 Nm.
NOTE: pay attention to the orientation of the metal cable guide; orient it so that it moves the clutch cable as far as possible away from the exhaust manifold and with a distance from the right fairing of 4 mm:

- Reposition the clutch switch connector on the command side of the cable using the two rubber ties previously removed:

- Ensure to have **5mm of freeplay** on the clutch lever.
- Ensure that all clutch cable play adjustment adjusters are locked.
- Refit the right-hand fairing.
- Check that all components function correctly and ensure that the handlebar has the correct rotation in both directions.
- Perform a dynamic test of the vehicle.

Thanking you in advance for your cooperation, we remain at your disposal for any technical/commercial support.

Kind regards,

MV AGUSTA MOTOR S.p.A.
