New-Blitz Table Replacement Castors

Technical Support

2002.1

USA Only

Porsche Special Tools & Equipment has received many concerns over the past years about the failure of Blitz Table (VAS 6832) castors. We have been working with a world renowned castor company Blickle (2 years approximately) from Germany, that has a North American distribution warehouse near PCNA. This castor company has taken the time to research and test our original castors to find out why they fail. The end result is that the type of Poly (Ester/Urethane) used in the composition of the castor wheel is known to absorb moisture over time. In regions of the U.S. this type of moisture incursion could be at a higher risk in areas with high moisture content in the atmosphere (coastal regions) . With many months of testing at PCNA and the new manufacturer. Porsche Special Tools & Equipment is ready to release the New Replacement Castor's for our Blitz Tables. You must order two each of the listed part numbers below through POLARIS (Porsche Parts Logistics) We recommend that each dealer replace all four wheels on the first new upgrade from the old wheels to be sure that the table is perfectly balanced. If you have any questions about these new castors please feel free to contact Porsche Special Tools & Equipment at askthetoolguy@porsche.us This bulletin replaces bulletin # SPTL 2002
