Service

After scanning the vehicle, but before entering activation codes, make sure Address Word 69 (trailer hitch module) is identified in the control module list.

If not:

- Perform code bus master and select Address word 69 to make sure it is identified.
- Perform the activation.

If this is not performed, error (Processing the enabling measure in the FM was impossible) will occur.

Activation codes (example from trailer hitch install), test plan will be under special functions "Adapting Software":

- Select option 4, (Proceed with conversion/retrofit solution with license protection)

AHVONAR-----first line will always be letters

30C0002CD536----second line will be zeros not O's

227137-----third line will be numbers

Once complete, and to determine if the activation was successful, PR codes can be checked for a new PR code being added to the top of the PR code list. This will begin with "#" as seen below. PR codes will populate immediately after successful activation. See figure 1 below.
