

87 Air Conditioning is inoperative, DTC B11AE15

87 22 32 2067362/2 September 20, 2022. Supersedes Technical Service Bulletin Group 97 number 22-84 dated June 22, 2022,

for reasons listed below.

Model(s)	Year	VIN Range	Vehicle-Specific Equipment	
Q8	2020 – 2023	All	Not Applicable	
SQ8, and RS Q8	2021 - 2023	All		

Condition

REVISION HISTORY			
Revision	Date	Purpose	
2	-	Revised <i>Required Parts and Tools</i> (updated part number for tape)	
1	06/22/2022	Initial publication	

Customer states:

• Customer states the A/C is inoperative and does not cool the vehicle.

Workshop findings:

The following DTC is stored in the onboard supply control unit J519 diagnostic address 0009.

• DTC B11AE15: A/C compressor regulator valve, open circuit/short circuit to B+.

Technical Background

The wiring to the A/C compressor connector T3r is not long enough. Wires may become stretched, broken, or pulled from the connector as a result.

Production Solution

Harness length increased in production.

Service

If DTC B11AE15: A/C compressor regulator valve Open circuit/short circuit to B+ is stored in the onboard supply control unit J519 diagnostic address 0009, inspect the wiring at connector T3r in the area of the A/C compressor as seen in Figure 1.

Tip: It may be necessary to cut back the harness tape several inches to expose the damaged section of the harness.

Figure 1. N280 control wire damaged at T3r connection

If damage is found in this area, all 3 wires will need to be extended following the directions below.

Page 2 of 5

^{© 2022} Audi of America, Inc.

- 1. Cut back the damaged wire(s) until the wires are clean and free of any corrosion.
- 2. Extend all 3 wires so that a length of approximately 110mm is achieved when measuring from the base of the connector to the first branch in the harness. See Figure 2.
- 3. Ensure there is enough slack to keep the harness from stretching however not so much the wires hang down.
- 4. Repair and modify the harness using VAS 1978 B.
- 5. Wrap the harness section using fabric adhesive tape N 105 920 02.

Wrap wires up to 20mm from the base of the connector housing, as seen on the original harness in Figure 1.

6. Clear faults and perform a functional check.

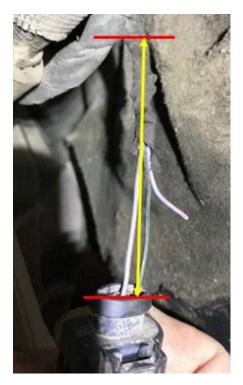

Figure 2. Measure 110 mm from T3r to the first harness branch

Warranty

Claim Type:	 110 up to 48 Months/50,000 Miles. G10 for CPO Covered Vehicles – Verify Owner. If the vehicle is outside of any warranty, this Technical Service Bulletin is informational only.
Service Number:	9712
