

New Information

We are pleased to announce the addition of a 10.5K front axle with a 12K front suspension for our Saf-T-Liner eC2, Jouley available for orders accepted with planned chassis start dates after 1/1/2023. The introduction of these options allow Jouley to be configured to meet a higher Gross Vehicle Weight Rating (GVWR) for specific markets and/or customers. The new options and list prices are outlined below for your reference.

The options are required together when selected and are available only to our Saf-T-Liner eC2.
