

We've been notified by Weldon that they are no longer able to provide LED lamp 162362. This light is across all product lines and this shortage will impact our production beginning the week of 9/26/22. Our necessary containment of these immediate shortages is to begin updating order content to alternative lamp option. **We will begin these changes for quotes that are inside the 60 day frozen zone.**

- **Type D and A:** B329014000 will be updated to B329021000.
- **Type D:** B339602000 has no alternative and will be removed.
- **Type C:** D425500000 will be updated to D425500001.

For all quotes outside of our 60 day frozen period that are configured with option D425500000, B329014000 or B339602000 our ask is that you **update to the alternative lamp selections through RACE** or **remove the affected option from your order if it is not required.**

Our efforts to find an alternative lamp that meets necessary customer requirements is underway. In order to alleviate the production impact of this shortage, we need your support to carry out these containment actions in the meantime.

PRODUCT	OPTION	DESCRIPTION	LIST PRICE
C2	D425500000	LPS-EXT AFT OF REAR WHEELS	
C2	D425500001 (alternative)	LPS-EXT AFT OF REAR WHEELS
