

TBB Engineering has reviewed the MY23 standard package change; specifically the factory-installed radio. It has been determined that the radio supplied by GM is an integrated part of the chassis electrical system and will not be removed and replaced by the current TBB radio offering.

We ask that the dealers submit change orders outside of the frozen zone to remove the B2604-04-000 option from the MY23 GM / Chevy orders that have been placed already.

B2604-04-000 will still be available on Ford chassis orders

Body Speakers, Page, and Noise Suppression options are under review, but anticipate there will be no issues with the interface of these options.

☐ Saf-T-Liner C2	☐ Saf-T-Liner HDX	☐ Saf-T-Liner EFX
☒ Minotour DRW	☒ Minotour SRW	☐ Minotrek
