

PIVI – USB

20-23MY Defender 21-23 MY Discovery, Discovery Sport, Range Rover Evoque, New Range Rover, New Range Rover Sport, Velar, E-Pace, I-Pace, F-Pace, XF

Customer Voice:

USB stick not recognized when inserted into the Front Portable Media Interface Panel (FPMIP). This can occur in the following scenarios:

- Installing maps at PDI
- Updating the ICCM/IGM via service tools
- Media playback from a source connected via USB

Technical Description:

Under investigation

Action:

1. Please Do NOT attempt any repairs or reset the system until advised as engineering requires logs.
2. Refer to SSM75727, SSM75728 for further details.
