Release Date: January 2022

Symptom/Vehicle Issue: Front Inside Door Handle Slow Or Lazy To Return

Customer Complaint/Technician Observation: Customer may notice when opening the front doors from the inside door handle the handle is slow to return to its at rest position.

Discussion: If the condition is verified, replace the front inside door handle cable for that door. Only replace the cable for the door with the concern. Refer to Service Library for remove and install: 23 - Body / Doors - Front / PANEL, Door Trim / Removal and Installation for steps to gain access to the cable.

This document does not authorize warranty repairs. This communication documents a record of past experiences. STAR Online does not provide any conclusions about what is wrong with the vehicle. Rather, it captures all previous cases known that appear to be similar or related to the vehicle symptom / condition. You are the expert, and you are responsible for deciding on the appropriate course of action.
