

STAR ONLINE PUBLICATION

Case Number: S2208000075

Release Date: March 2022

Symptom/Vehicle Issue: Check Engine Light Is On, No Start. DTC's P00FD, P0562, P26F3

Discussion: If the check engine light is on and the vehicle exhibits a no start condition. The concern could be caused by a loose cable attached to the Power Control Relay(PCR).

Diagnosis: Scan the vehicle for DTC's. If P00FD, P0562, and/or P26F3 are found. Inspect the power cables at the PCR.

Repair Procedure: If the cables are loose at the PCR, tighten them using service specifications.

This document does not authorize warranty repairs. This communication documents a record of past experiences. STAR Online does not provide any conclusions about what is wrong with the vehicle. Rather, it captures all previous cases known that appear to be similar or related to the vehicle symptom / condition. You are the expert, and you are responsible for deciding on the appropriate course of action.
