

# Revised Power Steering Oil Cooler

M-645-002

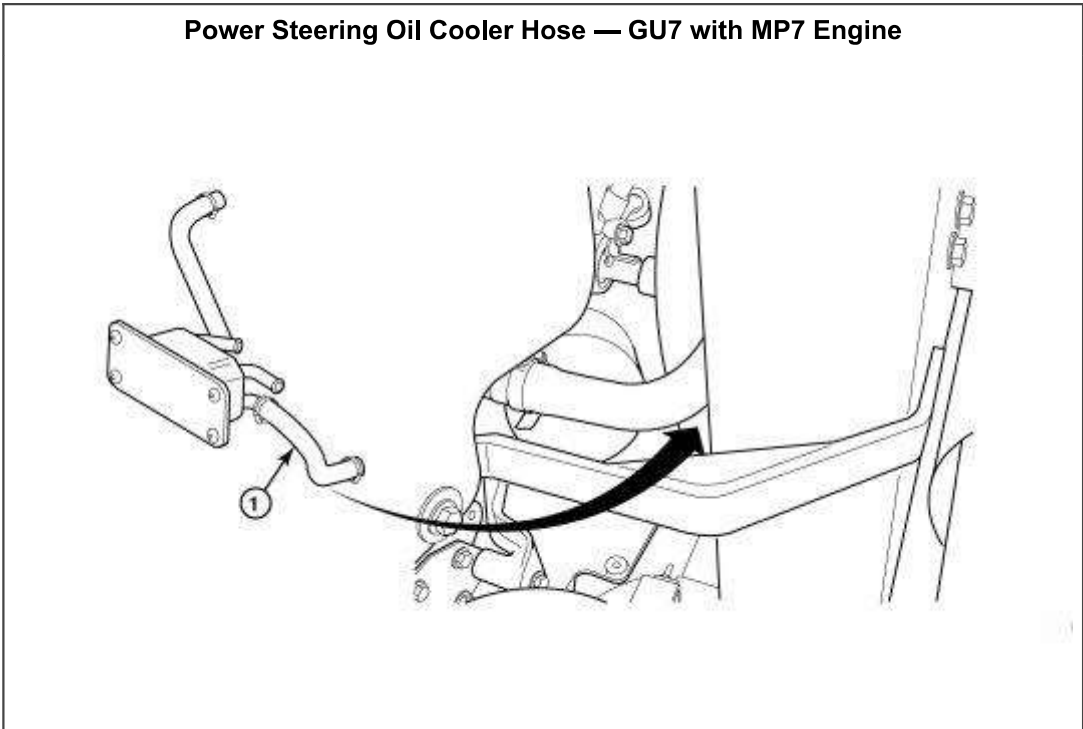

(February 2008)

## Valid for

All GU7 models built with an MP7 and before January 31, 2008

## Case description

Effective January 31, 2008, a revised power steering oil cooler hose (part number 21047263) was implemented into production, replacing the original hose (part number 21047242) on GU7 model chassis equipped with an MP7 engine. This change was made to correct an interference condition that exists between the power steering oil cooler hose and the lower frame flange. Should contact between the power steering oil cooler hose and the frame rail lower flange be encountered on a chassis manufactured prior to January 31, 2008, the existing hose should be replaced with the revised hose.

| Key | Qty. | Part number | Description                            | Replaces |
|-----|------|-------------|----------------------------------------|----------|
| 1   | 1    | 21047263    | Hose, lower, power steering oil cooler | 21047242 |
