Customer Satisfaction Program 22B28

Ford Power-Up

Customer Satisfaction Program 22B28

We've updated your heating system (HVAC) to improve the heat capability in your vehicle when exterior temps are at or below -15 C/5 F. In other words, we're helping ensure you stay nice and cozy inside your vehicle whether you are driving at highway speeds or taking a Sunday cruise around town.

This completes Customer Satisfaction Program 22B28. There is nothing you need to do.

Ford Power-Up software updates like this help us make improvements without the inconvenience of asking you to leave home. At Ford we value your satisfaction, and we respect your time.
