Service Alert No.: SA-041/22

Mazda3 Repair

1. Remove the 4 screws (1), then remove the connectivity master unit (CMU) (2) from the center display (3).

- 2. Place the cushion sheet (1) that wrapped lens before, on a clean, flat surface.
- 3. Put on the rubber gloves.
- 4. Place the center display (2) on the cushion sheet (1) with the display side facing downward.

5. Remove the 4 screws from the center display cover panels.

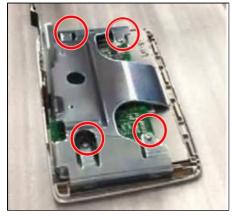

Page 6 of 26

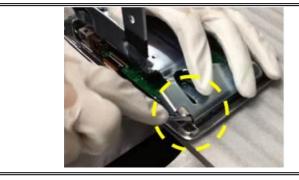

6. Remove the lower cover panel by pulling it up off the bracket, then lift off the back cover panel.

7. Remove the 4 screws from the bracket.

8. Unlock the bracket with a flat head screw driver by carefully prying out and upward on the bracket.

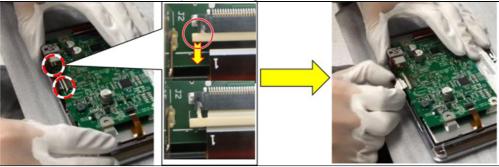

CAUTION: DO NOT pry on the printed circuit board.

Page 7 of 26

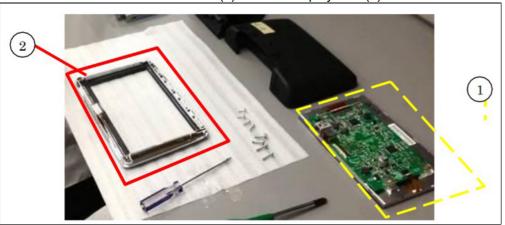

9. Remove the bracket.

10. Unlock and disconnect the printed wiring harness.

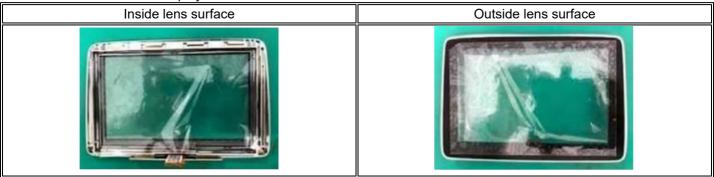

11. Remove the electric circuit board (1) from the display lens (2).

CAUTION: Be very careful handling the electric circuit board as it will be reused.

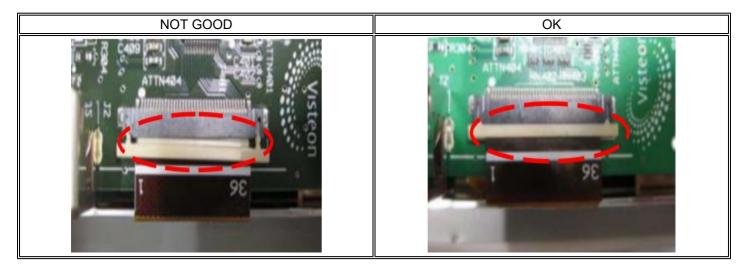

Page 8 of 26

12. Assemble the modified display lens with the removed electric circuit board.

NOTE 1:

- Peel off the protection film from the inside lens surface when replacing.
- Peel off the protection film on the outside lens surface after installing the center display to the vehicle.

NOTE 2: Solidly connect the printed wiring harness to the connector in order to avoid the half insertion of the printed wiring harness.

13. Install the center display in the reverse order of removal.

NOTE: DO NOT tighten the screws too tightly, but tighten them so that they do not come loose.

14. Verify the repair.
