TO: All Winnebago® Era, Boldt, View, Navion and Revel Dealers,

RE: Mercedes-Benz AG Global Safety Recall

As many of you are already aware, Mercedes Benz (MBZ) has issued a global safety recall relating to an electronic parking brake on the Sprinter chassis. It affects MY2019 through MY2022 and includes all Winnebago Motorhome (WMH) inventory and all dealer inventory (as well as our competitors). Effective immediately, WMH and our dealers are unable to ship, sell or deliver these affected products until the recall is remedied, as is required by federal law.

The remedy is a software update. A software fix for MBZ owned inventory has already been identified and is currently being installed in new chassis arriving in Forest City. A software fix for WMH and dealer owned inventory is still under development but is estimated to be ready in Q1 CY2023. Our team is fully engaged, and we are continuing to work with Mercedes to resolve this issue as fast as possible.

While the situation is fluid, this issue will cause significant disruption to WMH and also to you, our dealers. We are currently working hard on counter measures and opportunities to best navigate the weeks ahead and we will update you as we learn more.

Together, our businesses built extraordinary resilience and agility during the pandemic. We are confident that we will manage through this near-term issue with determination and creativity and emerge together with our business momentum and winning spirit intact.

Thank you for your continued support.

Kind Regards,

A handwritten signature in dark ink that reads "Huw Bower".

Huw Bower
