

UPDATES, PERFORMANCE IMPROVEMENTS & OPTIMIZATIONS

With this update, we're launching SiriusXM Beta and making minor updates and improvements to your vehicle's infotainment experience.

To give you even more ways to enjoy your favorite audio in your Lucid Air, we're pleased to be introducing SiriusXM Beta in this release as a complimentary addition to your Media experience.

SiriusXM Beta for Lucid delivers the ultimate in audio with ad-free music, live sports, original talk shows, Howard Stern, exclusive comedy, national and international news, and much more. Discover 350+ channels including:

Live Channels - Ad-free Music, Sports, News, and Talk channels

Pandora Stations - Turn your favorite artists into dedicated music channels

Xtra Channels - Curated by SiriusXM's programming team to bring you targeted channels around the genres you love

Podcasts - The best collection of podcasts curated for you, including SiriusXM originals and series from Marvel

'For You' Recommendations - Personalized recommendations based on your listening history

Favorites - When you hear something you like, make it a favorite and come back to it at any time

After installing this update, you can start listening to SiriusXM Beta in two ways:

- From the right Cockpit Panel, tap the Media button, then tap SiriusXM. The first time you tap, you'll be prompted to try SiriusXM Beta.
- From the Pilot Panel, go to Vehicle Settings > Applications. Tap SiriusXM and follow the prompts.

You can then access SiriusXM the same way you access your other favorite Media apps.

Note that this is a beta release. We're looking forward to sharing the full version in an over-the-air update next year along with a free 3-month trial for all Lucid owners.

We're also making other minor updates and enhancements to your infotainment experience.
