

STAR ONLINE PUBLICATION

Case Number: S2208000089

Release Date: April 2022

Symptom/Vehicle Issue: Airbag Light On And/Or Passenger Seat Belt Unbuckled Message Displayed. Driver And Passenger Seat Belt Connector Not Fully Seated

Discussion: The airbag light may be on and/or the passenger seat belt unbuckled message may be displayed. DTC B0050-13 - Driver Seatbelt Sensor Circuit Open and/or B0052-13 - Passenger Seatbelt Sensor Circuit Open may be set in the ORC. These faults may occur if either of the seat belt connectors are not fully seated.

Diagnosis: Check the seat belt connections to confirm they are fully seated prior to replacing any components.

Repair Procedure: Disengage the driver and passenger seat belt connectors from the body harness and reconnect. Confirm the seat belt connectors are fully seated and locked. Confirm the airbag light, passenger seat belt unbuckled message and DTC's are no longer active.

If the concern still exists, follow the DTC flow chart to determine root cause.

This document does not authorize warranty repairs. This communication documents a record of past experiences. STAR Online does not provide any conclusions about what is wrong with the vehicle. Rather, it captures all previous cases known that appear to be similar or related to the vehicle symptom / condition. You are the expert, and you are responsible for deciding on the appropriate course of action.
