OVER THE AIR UPDATE

NO ACTION NEEDED FROM THE WORKSHOP

Campaign No. :	Campaign Desc. :	Update Hermes Communication Module Software
2022100006/7	VS2/VS3SIMKOM	
<p>This is to notify you of a Recall Campaign Launch notification to update the Hermes Communication Module Software on approximately 17,165 MY19-21 Mercedes-Benz Sprinter vans and 80 MY20-21 Mercedes-Benz Metris vans. The recall campaign will be visible on the www.safercar.gov website and may generate questions from customers. All affected VINs will be flagged “OPEN” in VMI and cannot be sold until shows “CLOSED”.</p>		
Background		
Issue	<p>Mercedes-Benz AG (“MBAG”), the manufacturer of Mercedes-Benz Sprinter and Metris vans, has determined that due to an interaction between a SIM card security mechanism and the affected SIM profile, the SIM card might inadvertently become disabled. Should this occur, the communication module would not be able to establish a connection with a mobile phone network. In this case, the eCall function would not be available. Therefore, the condition may preclude or delay the arrival of emergency responders. This might increase the consequences of an injury following an emergency event.</p>	
What We’re Doing	<p>MBUSA is conducting a voluntary recall. As a precautionary measure, the supplier of the SIM card will update the SIM profile of the communication modules on the affected vehicles. This update is planned to be performed Over-The-Air with no workshop visit being required. If the over-the-air update cannot be successfully completed, the customer will be notified and advised to visit an authorized dealer to have the update performed.</p>	
Remedy	<p>OTA has begun and remedied vehicles will be reflected in VMI</p>
