

New Release

First Light’s Fully Illuminated Stop Arms (FISA) will be available to order for our Saf-T-Liner C2 and eC2 products beginning December 12, 2022. Available with either an electric or air actuated drive, you can also select options for front and rear stop arm positions. First Light Stop arms are illuminated and reflective, include the wind guard, strobing led lamps and meet FMVSS 131.

These options are available to select beginning December 12, 2022 for new C2 and eC2 orders. Change order requests for existing C2/eC2 orders will be subject to material lead time requirements.

We will monitor the adoption of these stop arms on our type C products to determine the priority for the type A and D product releases.
