

## GPOP - Issue Review System

**Part Number:**

68521351A\$

**Part Description:**

---

Engine Harness

---

**Issue  
Description:**

If the engine harness is being replaced for collision, proceed as normal. Otherwise, a connector repair kit might be a better option by checking availability on the Mopar connector repair kit website:  
<http://connectors.dcctools.com/home.htm;jsessionid=C6A3F1B696B030953878BF34FE86A8FE> Please send images of any damaged connectors along with a VIN and reason why the harness is needed before replacement to FCA Redacted Content. If no response in 15 minutes, proceed with repair.
