### GLOBAL SAFETY FIELD INVESTIGATIONS DCS6394 URGENT - DISTRIBUTE IMMEDIATELY

Date: January 6, 2023

- Subject: REVISION: N222372591-01 Service Update Charge Air Cooler Icing Revised Attention Box and Dealer Responsibility Section
- Models: 2020 2022 Buick Encore GX 2021 – 2022 Chevrolet Trailblazer
- To: All General Motors Dealers

This bulletin is being revised to update the expiration date and dealer responsibility section. Please discard all previous copies of bulletin N222372591.

END OF MESSAGE GLOBAL SAFETY FIELD INVESTIGATIONS

### Release Date: January 2023

#### Revision: 01

**Revision Description:** 

This bulletin is being revised to update the expiration date and dealer responsibility section. Please discard all previous copies of bulletin N222372591.

### Attention: This service update will expire June 30, 2024.

		Model Year		Model Year		Model Year			
Make	Model	From	То	RPO	Description				
Buick	Encore GX	2020	2022						
Chevrolet	Trailblazer	2021	2022						

Involved vehicles are marked "Open" on the Investigate Vehicle History screen in GM Global Warranty Management system. This site should always be checked to confirm vehicle involvement prior to beginning any required inspections and/or repairs.

Condition	Certain 2020 - 2022 model year Buick Encore GX and 2021 - 2022 Chevrolet Trailblazer vehicles may have a condition in which ice or sludge can accumulate in the Charge Air Cooler (CAC) or Closed Crankcase Ventilation (CCV) system when driving in extremely cold weather conditions (-18°C (0°F) or less).
Correction	

#### Parts

No parts are required for this repair.

#### Warranty Information

Labor		Labor	Trans.	Net
Operation	Description	Time	Туре	Item
9106358*	Verified Module Software or Calibration Level: Module Is Programmed with Same Level Software or Calibration	0.2	ZFAT	N/A
9106359*	Engine Control Module Reprogramming with SPS			

Important: \* To avoid warranty transaction rejections, carefully read and follow the instructions below:

Labour Operation Code:	
	SPS Warranty Claim Code:
Additional labour op code information:	

6125814

- The Warranty Claim Code from the programming event must be accurately entered in the "Warranty Claim Code" field of the transaction.
- When more than one Warranty Claim Code is generated for a programming event, it is required to document all Warranty Claim Codes in the "Correction" field on the job card. Dealers must also enter one of the codes in the "Warranty Claim Code field of the transaction, otherwise the transaction will reject. It is best practice to enter the FINAL code provided by SPS2.

### Warranty Claim Code Information Retrieval

	VIN	Module	Function	Warranty Claim Code	Job Card	ect Tool
iva Vers 8.0_92	1,2000000000000000000000000000000000000	K73 - Telematics Communication Interface Control Module	Programming & Service Activation		test	
5.0_92		K9 - Body Control Module	Programming		test	
	101101010100000	K5 - Automatic Level Control Module Ignition	Off	-	test driver	
	1	K56 - Serial Data Gateway Module	Programming		test driver	
	K (			1	>	
					Ok Cancel	

If the Warranty Claim Code was not recorded on the Job Card, the code can be retrieved in the SPS2 system as follows:

- 1. Open TLC on the computer used to program the vehicle.
- 2. Select and start SPS2.
- 3. Select Settings (1).
- 4. Select the Warranty Claim Code tab (2).

The VIN, Warranty Claim Code and Date/Time will be listed on a roster of recent programming events. If the code is retrievable, dealers should resubmit the transaction making sure to include the code in the SPS Warranty Claim Code field.

### Service Procedure

Note: Carefully read and follow the instructions below.

- Ensure the programming tool is equipped with the latest software and is securely connected to the data link connector. If there is an interruption during programming, programming failure or control module damage may occur.
- Stable battery voltage is critical during programming. Any fluctuation, spiking, over voltage or loss of voltage will
  interrupt programming. Install a GM Authorized Programming Support Tool to maintain system voltage. Refer to
  www.gmdesolutions.com for further information. If not available, connect a fully charged 12 V jumper or booster
  pack disconnected from the AC voltage supply. DO NOT connect a battery charger.
- Follow the on-screen prompts regarding ignition power mode, but ensure that anything that drains excessive power (exterior lights, HVAC blower motor, etc) is off.
- Clear DTCs after programming is complete. Clearing powertrain DTCs will set the Inspection/Maintenance (I/M) system status indicators to NO.

**Important:** The service technician always needs to verify that the VIN displayed in the TLC left side drop down menu and the top center window match the VIN plate of the vehicle to be programmed prior to using Service Programming System 2 (SPS2) for programming or reprogramming a module.

- For the TLC application, service technicians need to always ensure that the power mode (ignition) is "ON" before
  reading the VIN from the vehicle's VIN master module and that they do not select a VIN that is already in the
  TLC application memory from a previous vehicle.
- If the VIN that shows up in the TLC top center window after correctly reading the VIN from the vehicle does not
  match the VIN plate of the vehicle, manually type in the VIN characters from the vehicle VIN plate into the TLC
  top center window and use these for programming or reprogramming the subject module with the correct vehicle
  VIN and software and/or calibrations.

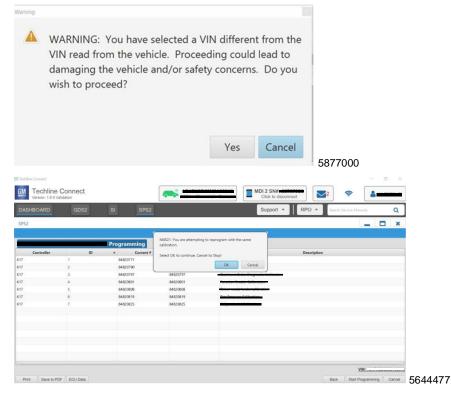

- The Engine Control Module (ECM) is the master module (for VIP vehicles) that TLC reads to determine the VIN
  of the vehicle. If the VIN read from the vehicle by TLC does not match the VIN plate of the vehicle, the ECM also
  needs to be reprogrammed with the correct VIN, software and calibrations that match the vehicle's VIN plate.
- The Body Control Module (BCM) is the master module (for GEM vehicles) that TLC reads to determine the VIN of the vehicle. If the VIN read from the vehicle by TLC does not match the VIN plate of the vehicle, the BCM also needs to be reprogrammed with the correct VIN, software and calibrations that match the vehicle's VIN plate.

**Caution:** Be sure the VIN selected in the drop down menu (1) is the same as the vehicle connected (2) before beginning programming.

Important: If the vehicle VIN DOES NOT match, the message below will be shown.

Important: Techline Connect screens shown above.

**Important:** If the same calibration/software warning is noted on the TLC Summary screen, select OK and follow screen instructions. After a successful programming event, the WCC is located in the Service Programming System dialogue box of the SPS Summary screen. No further action is required. Refer to the Warranty section of the bulletin.

1. Reprogram the Engine Control Module. Refer to K20 Engine Control Module: Programming and Setup in SI.

**Note:** The screenshot above is an example of module programming and may not be indicative of the specific module that is being programmed. Module selection and VIN information have been blacked out.

**Important:** To avoid warranty transaction rejections, you MUST record the warranty claim code provided on the Warranty Claim Code (WCC) screen shown above on the job card. Refer to callout 1 above for the location of the WCC on the screen.

2. Record SPS Warranty Claim Code on job card for warranty transaction submission.

### Dealer Responsibility

Dealers must take the steps necessary to ensure that the service update correction has been made to all involved vehicles before selling or dealer-trading the vehicle, but no later than June 30, 2024.

All new, used, GM Certified Used, courtesy transportation vehicles, dealer shuttle vehicles, etc. in dealers' possession and subject to this bulletin <u>must</u> be held and inspected/repaired per the service procedure of this bulletin <u>before</u> customers take possession of these vehicles. Involved vehicles must be held and not delivered to customers, dealer-traded, released to auction, used for demonstration, or any other purpose.

All GM Certified Used vehicles currently in the dealers' inventory within the Certified Pre-Owned Inventory System (CPOIS) will be de-certified and must be held and remedied per the service procedure in this bulletin. Upon submitting an accepted/paid warranty transaction in the Global Warranty Management (GWM) system, the vehicle can be re-certified for sale within the CPOIS system, or once again be used in the CTP program.

### Dealer Reports - For USA

The Inventory tab of the Open Vehicle Report will contain Service Update Bulletin VINs that apply to this field action. This information is intended to assist dealers with the **PROMPT COMPLETION** of these vehicles. The Customer In-Service tab will not contain Service Update Bulletin VIN data because the intent of a Service Update Bulletin is to not inconvenience a customer with a special trip for service. Service Update Bulletins are to be completed when the customer is in for a regularly scheduled visit.

GM bulletins are intended for use by professional technicians, NOT a "<u>do-it-yourselfer</u>". They are written to inform these technicians of conditions that may occur on some vehicles, or to provide information that could assist in the proper service of a vehicle. Properly trained technicians have the tools, equipment, safety instructions, and know-how to do a job properly and safely. If a condition is described, <u>DO NOT</u> assume that the bulletin applies to your vehicle, or that your vehicle will have that condition. See your dealer for information on whether your vehicle may benefit from the information.

We Support Voluntary Technician Certification
