

## **SSM 51311**

### **2018-2023 Expedition/Navigator - Easy Entry Second Row Seating - Second Row Seat Is Locked In Forward Tilted Position Preventing Rearward Movement**

Some 2018-2023 Expedition/Navigator vehicles may have a concern where the second row seat is locked in the forward tilted position while using Easy Entry preventing rearward movement. To unlock the seat, tip the seat back fully forward and slide the seat fully forward to its end of track travel. This will allow the seat to then be free to move rearward. This operation is characteristic to the Easy Entry feature of the second row seats. Do not force the seat rearward while in the locked position as it can result in damage to the seat track. Refer to the vehicle's Owner's Manual for further details.
