

Model: Piaggio 1 Motorcycle, Piaggio 1 Moped Long Range, Piaggio 1 Moped 25 km/h, Piaggio 1 Moped Short Range

Subject: New calibration for the traction battery ECU update (BMS Battery Management System)

Dear Dealer / Service Centre / Authorised workshop,

Please note that the new calibration for the traction battery ECU is available for the aforementioned model by downloading it from the P.A.D.S. diagnostic tool (which must be updated to the most recent version available).

The aforementioned operation is considered part of the normal scheduled maintenance required for the vehicle, and must be performed at the same time as other scheduled maintenance operations either during the pre-delivery procedure, for new vehicles, or at the first available opportunity when the vehicle is brought to the service centre, in the case of vehicles that have already been sold and are in use.

Model Model	Versione Version	ECU code Ecu internal code	New software New map
Piaggio 1 Moped 2021-2022 (EMEA) Piaggio 1 Moped 25Km/h 2021-2022 (EMEA) Piaggio 1 Motorcycle 2021-2022 (EMEA) Piaggio 1 Motorcycle 2022 (APAC) Piaggio 1 Motorcycle 2022 (NAFTA)	EMEA APAC NAFTA	1A018946	FK06B05
Piaggio 1 Moped 2021-2022 (EMEA) Piaggio 1 Moped 2022 (APAC) Piaggio 1 Moped 25Km/h 2021-2022 (EMEA) Piaggio 1 Moped 30 MPH 2022 (NAFTA)	EMEA APAC NAFTA	1A018947	FK06S05

The new software introduces the following functional improvement:

- Improved recharging management

After installing the new map, no further operations are necessary.

It should also be noted that a misguided management by the operator compromises the installation of the software on the BMS/VMS (example: the pc turns off during reprogramming - the PC/PADS is disconnected during programming - the OS unexpectedly closes the application - you have hardware that is not functioning correctly) it will always be possible to retry programming by enabling the function without constraints with support for the Help Desk.

Best regards,
