WNQ3 Workshop campaign – Checking windscreen and re-bonding if necessary

WNQ3 Workshop campaign - Checking windscreen and re-bonding if necessary

ID Number	WNQ3
Models	Macan (95B)
Model Years	2021
VIN List	Attached
Number of Affected VINs	6
Issue Description	It is possible that the windscreen was not fitted accor- ding to specifications on the affected vehicles during the production process.
	Due to a potentially insufficient hardening of adhesive, a gap can occur between the windscreen seal and the roof. As a result, wind noises can be heard by the cu- stomer from a driving speed of approx. 40 mph.
	For this reason, the windscreen must be checked on the affected vehicles and re-bonded depending on the test result.
What Dealers Should do	Please arrange for this measure to be carried out as soon as possible on affected vehicles. As of the time of this posting (2/9/23), the repair is immediately available. Parts can be ordered as normal via PPL.

TI Number

No. 209-22

Required parts

Part number	Designation	Quantity/vehicle	Parts return
00004330535*	Adhesive set	1 piece	No
