PRODUCT BULLETIN #477

Date: March 14, 2023

Subject: 12-¼" x 5" Drum and Disc Brakes Capacity Increase to 16,000 lbs.

Dexter has tested and improved the 12-¼" x 5" drum and disc brakes product lines to increase the rated capacity to 16,000 lbs. per axle. The increased capacity on these brakes will not affect the current Dexter part numbers, but part descriptions and literature are being updated to the new capacity. This is a running change and will begin immediately.

For service or repairs on a D150 axle, combining Dex-Treme D160 braking components listed in this product bulletin with those originally installed is acceptable.

AFFECTED PART NUMBERS:

BULK PART NUMBER	KIT PART NUMBER	UPDATED DESCRIPTION
023-162-00	K23-162-00	12-¼" x 5" **16K** HYDRAULIC, LEFT HAND, DUO-SERVO, W/ PARK, REAR SELF-ADJUST
