SUBJECT:	NO:	TSB-23-55-002		
COOL AIR EX	DATE:	March 2023		
TURNED OF	MODEL: 2022-23 Outlander			
CIRCULATE TO:	[] GENERAL MANAGER	[X] PARTS MANAGER		[X] TECHNICIAN
[X] SERVICE ADVISOR	[X] SERVICE MANAGER	[X] WARRANTY PROCESSO	R	[] SALES MANAGER

## PURPOSE

This bulletin provides instructions to reprogram the HVAC ECU software for the A/C Auto Amplifier.

#### BACKGROUND

When in ECO drive mode, the A/C Auto Amplifier program allows the compressor to remain in the ON position after the A/C is turned off, expelling cool air. The A/C Auto Amplifier program has now been updated to turn the compressor OFF when the A/C is turned off and the vehicle is in ECO drive mode. Please reprogram the HVAC ECU software on a customer complaint basis.

## AFFECTED VEHICLES

Certain 2022-2023 Outlander (VIN Cut-off JA4J4UA89PZ011552)

- Turn off all electrical devices to minimize the vehicle's electrical load. Also use an external power source to ensure that the vehicle battery maintains the specified voltage during reprogramming. Low voltage of the auxiliary battery may cause incomplete reprogramming and should that occur the ECU may require replacement.
- Write down all the customer's electrical device settings such as A/C and radio before reprogramming and restore them after reprogramming.
- Connect the MUT-3 to an AC power source to prevent internal battery discharge.
- Before using, make sure the USB cable and MUT-3 main harness are not damaged.
- Do not perform maintenance work in the engine room during reprogramming. If the connection between the engine ECU and ETACS is lost, the cooling fan operates as fail-safe.
- Check the "All DTC" after reprogramming and erase them (if any).

The information contained in this bulletin is subject to change. For the latest version of this document, go to the Mitsubishi Dealer Link, MEDIC, or the Mitsubishi Service Information website (*www.mitsubishitechinfo.com*).

# EQUIPMENT

- The following equipment is needed to reprogram the ECU:
- VCI (Vehicle Communication Interface) or VCI Lite MB991824 or MB992744
- MEDIC Laptop/Tablet with A/C power adapter 520924, or FZG1MK2
- MUT III Main Harness "A" (blue connector at the DLC end) MB991910 or MB992745
- USB 2.0 Cable MB991827 or MB992747
- MEDIC 3.5/4 update at **786** or higher
- For Standalone MUT III units, MUT-III SE Reprogramming Database N230201NR or higher

# ECU REPROGRAMMING CHART

Model	Data No.	New SW Part No./Ver.	Target SW Part No./Ver.	Remarks
Outlander	27531W00.7PN	27531W007P	27760W000P 27760W001P 27760W006P 27760W007P 27531W003P	Dual zone climate
	27531W00.8PN	27531W008P	27760W002P 27760W008P 27531W004P	Triple zone climate

# SOFTWARE/MEDIC VERSION VERIFICATION PROCEDURE

1. Verify that the HVAC-ECU has not already been updated to the latest S/W number in the table above. If the ECU is at the latest level, reprogramming is not necessary.

**NOTE:** Reprogramming the HVAC-ECU with the latest database (e.g., **N230201NR** includes all past and current reprogramming for TSBs of affected vehicles. It is not necessary to reprogram the ECU for each previous TSB.

#### For MEDIC 3.5/4 users only: (MUT-III SEV users go to step 5)

Verify the MEDIC 3.5/4 is at version 3.5 and at update 786 or higher.
 If your <u>MEDIC 3.5/4 update is at least 786</u>, continue with the Reprogramming
 Procedure. If your <u>MEDIC 3.5/4 update is below 786</u>, update your MEDIC as follows:

3. Select the MEDIC 3.5/4 Admin tab and click on "Updates".

4. If the MEDIC update screen advises updates are available, click the "Begin" button. After all updates are complete, **GO TO THE REPROGRAMMING PROCEDURE**.

- 5. STANDALONE MUT-III SE SCAN TOOL VIEWER (STV) ONLY: (MEDIC 3.5 USERS GO TO THE <u>REPROGRAMMING PROCEDURE</u>). Verify that your MUT-III SE has the most current version of the reprogramming database from the MUT-III SE Main Page.
  - a. Press the MUT-III SE STV icon.

b. Press the Reprogramming button once the vehicle information is entered.

c. Press "ECU Reprogramming (SDB)" button.

- d. Confirm that the database number displayed in the upper right above the chart is **N230201NR** or higher.
  - i. If the database number displayed on your MUT-III SE is **N230201NR** or greater, continue to the next section.
  - ii. If the reprogramming database number displayed on your MUT-III SE is lower than **N230201NR**, then the MUT-III SE database needs to be updated.
  - iii. Once the database number is confirmed, hit the Home button to go back to the System Select screen.

## REPROGRAMMING PROCEDURE

# 

To ensure that the vehicle battery maintains 12V during the procedure, hookup a battery charger to the vehicle during the procedure.

NOTE: VCI Stand-alone reprogramming is not available for this procedure. The laptop/tablet and the VCI must remain connected for the entire procedure.

1. Connect the equipment as follows:

**NOTE:** VCI Lite and MEDIC 4.0 Toughpad shown for illustration purposes only.

- Turn the MEDIC PC/tablet on. If the battery indicator in the lower right hand corner of the screen does not show a full charge, it is recommended that either the battery be charged prior to beginning or be used with the A/C power adaptor connected.
- Connect the USB cable to the VCI/VCI Lite. When the laptop/tablet displays the MUT-III SE main screen, connect the USB cable to the device.
- Connect the MUT-III SE main harness with the blue DLC connection to the VCI/VCI Lite. Connect the blue connection of the MUT-III SE main harness to the vehicle's data link connector.
- For VCI only (p/n MB991824): Turn the VCI power switch ON. Verify that the indicator lamp in the upper right corner of the screen is green.

# 

DO NOT DISTURB THE HARNESS CABLES OR CONNECTIONS DURING THE REPROGRAMMING PROCESS AS IT COULD CAUSE THE CONTROL UNIT TO LOSE DATA. IF THE USB CABLE IS DISCONNECTED DURING THIS PROCEDURE, A WARNING MESSAGE WILL DISPLAY.

**NOTE:** Due to limited space it may be easiest to connect battery charger cable onto ground point.

2. Turn the ignition switch to the "ON" position.

a. Press MUT-III SE STV icon.

b. Press the model information display button (car icon) and verify all vehicle info is correct.

c. Press the Reprogramming button once the vehicle information is entered.

d. Press the "ECU Reprogramming" (SDB) button.

e. Select "HVAC" from the System List and press the OK button.

f. The Automatic ECU Reprogramming (SDB) database screen will display. Press the OK button.

g. Type AS2 account information (if applicable) and press the OK button to start the reprogramming.

**Note:** Do not disturb the cable or turn off the ignition during reprogramming to prevent damage to the ECU.

h. Once the reprogramming is initiated the screen will display the reprogramming progress. Verify that the software version has been updated to "27531W008PN".

i. Press the "ALL DTC" button to initiate " Erase and Read all DTCs". Press OK when complete.

**IMPORTANT:** The "Erase and Read all DTCs" must be performed since DTCs may be generated and stored.
