Applicability

YEAR(S)	MODEL(S)	ADDITIONAL INFORMATION
2023	Sequoia HV, Tundra, Tundra HV	

Introduction

A head unit software update is now available for 2023 model year Sequoia Hybrid, Tundra, and Tundra Hybrid vehicles equipped with Toyota Multimedia (version 1040 or earlier). This update provides improved performance and capability for the following:

- User profile.
- Over-the-air (OTA) notifications.
- Ability to search during a call.
- Bug fixes settings/configuration.
- Security enhancements.

Introduction (continued)

Vehicle operators can perform this update directly by accepting the on-screen notification (see Figure 1), advising the software update is available, or by locating the software update from the Settings menu and initiating the available update (see Figure 2). The release notes text below will be displayed to the customer:

"This software update includes improvements for User Profile, OTA notifications, ability to search during a call, and bug fixes."

r.	Info & security			Includes the	following
	Software update		1 Patani	mpovenen	5
8	Apps	>	Automatic	*User Profile *Over the sit	(013)
*	•			Disagree	Accept

If it is necessary to perform the software update for a customer, follow the software update procedures in this bulletin.

This is a phased rollout, which means that as time progresses, more vehicles will receive the update notification and ability to update the head unit. This timing will vary by location and may not display for every vehicle in one location at the same day/time.

MULTIMEDIA SOFTWARE FILE DOWNLOAD

The multimedia software update file may be downloaded directly from this Service Bulletin by clicking on the file name in the table above. Once downloaded, do NOT extract the files (unzip), the files need to be saved directly to a blank USB flash drive.

For USB flash drive requirements and download instructions, refer to *TIS* – *Diagnostics* – *Reprogramming* – *Reference Documents* – <u>*Multimedia Software Download Instructions*</u>.

NOTE

- The USB method should ONLY be used when the Wi-Fi/Cellular method of updating is unsuccessful.
- Multiple files can NOT be on the same USB flash drive, if there are two files on the drive beginning with "rb_update" the software installation will not begin.

10. Wait for the update to download. Once the head unit begins installation, the update will take 10 minutes or less.

NOTE

- Do NOT turn OFF the engine or ACC BEFORE the software is ready for updating.
- Selecting Cancel will cancel the installation of the specific component, but it can be installed manually later.
- If a major update is being installed the message "{Software update in progress}" will be displayed.

NOTE

- Do NOT turn OFF the engine or ACC BEFORE the software has updated successfully.
- Selecting Cancel will cancel the installation of the specific component, but it can be installed manually later.

OTA Update Procedure (Wi-Fi and Cellular) (continued)

12. The software installation is complete when either a "Software installation complete" banner (Figure 17) or the "Software update complete" screen (Figure 18) is displayed.

NOTE

If the vehicle has installed a major update, and the "Software update complete" screen is displayed, then an IG-OFF/ON will need to be performed prior to attempting to operate any of the infotainment functions.

USB Update Procedure

1. Download the software from the Software Update Information section onto an empty USB flash drive.

NOTE

- The USB method should ONLY be used when the Wi-Fi/DCM method of updating is unsuccessful. Even for USB update, confirm one of the following signals is present for the head unit:
 - Data Communications Module (DCM) (this function is NOT available in some countries or areas.)
 - Wi-Fi.
- Multiple files CANNOT be on the same USB flash drive. If there are two files on the drive beginning with "rb_update" the software installation will NOT begin.
- This process MUST be used for each applicable update file in this bulletin.
- 2. Select the gear icon and scroll down to Software update.

Figure 21.

Software Update Procedures (continued)

USB Update Procedure (continued)

3. Insert the prepared USB flash drive into the vehicle's data USB port.

NOTE

If there are no media files on the USB flash drive, there may be a "Device no response" banner. This is normal.

Figure 22.

4. Select Update Software.

NOTE

The "Update Software" button may not be available immediately after inserting the USB flash drive. The head unit is unzipping the software update file, and it may take up to 10 minutes for this button to become available to press.

5. Select Accept on the Terms of service screen.

Figure 24.

Software Update Procedures (continued)

USB Update Procedure (continued)

6. Wait for the update to download. Once the head unit begins installation, the update will take about 15 minutes per update file.

NOTE

- Do NOT turn OFF the engine or ACC BEFORE the software is ready for updating.
- Do NOT remove the USB flash drive until instructed in step 7.
- Selecting Cancel will cancel the installation of the specific component, but it can be installed manually later.
- A. When the update is complete, "Install Complete" will show on the head unit, as shown in Figure 26.
- B. The "Software update" pop-up message may also appear, as shown in Figure 27.

NOTE

If you are prompted to upload a report as shown in Figure 28, insert a blank USB to remove the .JSON files. These files are NOT needed at this stage of the process.

Figure 28.

Software Update Procedures (continued)

USB Update Procedure (continued)

- 7. Perform an ignition cycle. After the system has successfully booted up remove the USB flash drive.
- 8. Wait two minutes.
- 9. Perform steps 1 7 again if performing an additional update.
- Perform steps 1 3 of <u>OTA Update Procedure (Wi-Fi and Cellular)</u> to verify the software version matches the table below.
