-----------------------------------	-------------------------

Important: Available features, trim levels, equipment content and powertrains may differ in Canada. Consult the vehicle’s window label or the GM Canada Vehicle Order Guide.

General Information

Important: Service agents must comply with all International, Federal, State, Provincial, and/or Local laws applicable to the activities it performs under this bulletin, including but not limited to handling, deploying, preparing, classifying, packaging, marking, labeling, and shipping dangerous goods. In the event of a conflict between the procedures set forth in this bulletin and the laws that apply to your dealership, you must follow those applicable laws.

6334563

The First-Ever Envista defies most characterizations. But here are a few that fit perfectly: premium design, versatile, intuitive, tech-savvy, cargo-friendly, and perhaps best of all, fun to drive.

Exterior

Envista makes a great first impression. With its flowing roofline, sleek sportback design and low, wide stance, Envista provides a refreshingly new take on, well, just about everything.

Flowing from front to back, Envista's dramatic shape starts with signature LED daytime running lamps above its wide, low-mounted grille.

Prominently displayed on the front end and serving as a hallmark of the New Face of Buick, Envista proudly displays an updated Buick badge. The iconic tri-shield has been modernized to signify the brand's transformation and forward-thinking design language, while still providing a recognizable nod to Buick's pedigree.

Here's a look at the highlights and key differences between the three trim levels:

Preferred

Features a checkmark mesh grille pattern accented with bright inlaid grille bars. Preferred models are embellished with a contrasting mix of high-gloss black details and touches of bright accent, creating a beautiful, layered look that draws the customer in for a closer look.

ST

6334564

6334565

Avenir

6334566

6334568

Envista's best expression of modern athleticism, with dark-tinted black exterior accents complemented by a sporty interior inspired by athleisure-wear trends. A unique black grille with a tighter mesh pattern features the ST badge.

6334569

Exclusive satin Black Ice Chrome finishes, a three-dimensional woven grille pattern and premium 19-inch Pearl Nickel wheels represent the highest expression of Buick luxury, continuing to reinforce the defining cues of the Avenir sub-brand. On the rear end, exclusive clear-tinted taillamps create a captivating appearance.

Interior

6334571

Envista isn't just new. It's all-new and is designed to exceed expectations. Inside, available modern amenities and thoughtful features make the most of Envista's refined interior.

An available moonroof welcomes the sunshine, while QuietTuning **TM** technology and a sport-inspired flat-bottom steering wheel speak to Envista's mindful balance of style and substance.

- Flat Bottom Steering Wheel — In keeping with Envista's trend of providing an upscale feel across all trim levels, this sporty, youthful steering execution is standard on Preferred, ST and Avenir

6334572

- Embroidered Headrests — ST and Avenir emblems are stitched into the front headrests for an added touch of refinement.
- Illuminated Sun Visors — The driver and front passenger sun visors illuminate to help enhance the use of mirrors in low-lighting conditions.
- Cargo Shade — closes off the hatch area, isolating noise from the road, which contributes to the cabin noise reduction the Buick brand is committed to providing.
- Cupholders — To make the most of every inch, the compact design of the center console optimizes storage while keeping things simple by putting everything within reach. The back seat includes a fold down armrest in the center featuring two side-by-side cupholders.
- Four USB Ports — Two in front and two in back for easy access
- Passenger Seatback Storage — A pocket for maps or other small items is integrated into the seatbacks of both front seats.

Technology

6334573

19" Diagonal Combined Driver-Focused Screens — The 8" diagonal Driver Information Center and 11" diagonal Buick Infotainment System help make important information not just available, but easily accessible. The Driver Information Center display is customizable to help keep the driving information you need right where you need it. And the infotainment display adds touch-screen access to modern perks like smartphone integration.

The large, thin display is enabled by a new Buick Infotainment System (internally known as the Virtual Cockpit System, or VCS), which also provides a more connected experience with greater computing power and memory compared to previous infotainment systems, and is updatable over the life of the vehicle.

Like previous systems, customers can personalize the appearance of the screen by rearranging the app icons to their liking and customizing the app tray (along the left side of the screen) for easy access. Notably, this system also provides opportunity to be updated with new functionality and features over the life of the vehicle.

Wireless Apple CarPlay® Compatibility — With wireless Apple CarPlay® compatibility, you'll enjoy easy access to music and maps from your iPhone® to make calls, send messages and more—all through the infotainment touch-screen or with your voice through Siri®.

Wireless Android Auto™ Compatibility — Wireless Android Auto compatibility seamlessly connects your compatible smartphone so you can get directions using Google Maps, listen to music via Google Play and more using your Envista infotainment touch-screen.

Available Wireless Charging helps ensure the customer's phone stays powered up for their journey while they use their favorite apps.

Several media ports in the front and rear, including the option of both USB-A and USB-C ports, and a premium 6-speaker audio system help enhance the experience of all passengers.

8-Inch Diagonal Cluster Display

The 8-inch cluster display offers the latest technology, including the ability to choose from multiple different display themes and information pages.

Some of the display options include a traditional Gauge View that provides a visual snapshot of fuel level and speed, a Sport View that emphasizes speed and RPMs, and even a Clean View that minimizes the cluster graphics to provide a simplified display.

Customers can also choose to display information like active phone calls and audio selections, in addition to vehicle information such as trip odometer, tire pressure, fuel economy and more. Important alerts and warnings also appear in the cluster.

Safety

6334574

Safety or driver assistance features are no substitute for the driver's responsibility to operate the vehicle in a safe manner. The driver should remain attentive to traffic, surroundings and road conditions at all times. Visibility, weather and road conditions may affect feature performance. Read the vehicle's Owner's Manual for more important feature limitations and information.

Safety features inspire confidence. That's why Envista offers a range of standard and available technologies.

Buick Driver Confidence comes standard and includes six safety and driver-assistance technologies.

6334575

- Automatic Emergency Braking — At speeds below 50 mph (80 km/h), Automatic Emergency Braking works with Forward Collision Alert to help you avoid or reduce the severity of a collision with a detected vehicle you're following. The feature can automatically provide hard emergency braking or enhance the driver's hard braking.
- Forward Collision Alert — Forward Collision Alert warns you if it detects a potential collision with a detected vehicle you're following so you can take action. It can also provide a tailgating alert if you're following a vehicle much too closely.

- IntelliBeam Auto High Beams — At speeds above 25 mph (40 km/h), IntelliBeam can automatically turn the vehicle's high beams on and off according to surrounding traffic conditions.
- Following Distance Indicator — Following Distance Indicator displays the following time in seconds between your vehicle and a detected vehicle you're following to help you maintain a safe following distance.
- Front Pedestrian Braking — At speeds below 50 mph (80 km/h), Front Pedestrian Braking can help you avoid or reduce the severity of a collision with a pedestrian it detects directly in front of you. It provides alerts and can automatically provide hard emergency braking or enhance the driver's hard braking. It has limited nighttime and low visibility performance.
- Lane Keep Assist With Lane Departure Warning — Lane Keep Assist with Lane Departure Warning uses a brief, gentle steering wheel turn to alert you when it detects you are unintentionally drifting out of your lane lines. If needed, you may receive additional Lane Departure Warning alerts. System alerts do not occur if you're using your turn signal, or it detects you may be intentionally leaving your lane.
