

Preliminary Information

PIT6004 Rear Cross Traffic Auto Braking Off Message Appears Upon Starting The Vehicle And Shifting To Reverse

Models

Brand:	Model:	Model Years:	VIN:		Engine:	Transmissions:
			from	to		
GMC	HUMMER EV SUV	2024	All	All	All	All

Involved Region or Country	North America
Condition	<p>The vehicle was not built with the rear cross traffic auto braking feature. Some customers may notice a message "Rear Cross Traffic Auto Braking Off" alert upon starting the vehicle and shifting to Reverse. The message will display for a brief moment and will automatically go away quickly. This message will appear only after a long sleep cycle, on the initial start of the vehicle, and the initial gear selection is Reverse. If the customer first puts the truck in Drive after the first start-up, then Reverse, this message will not appear. (See Photo Below).</p>
Cause	The vehicle is displaying a redundant message indicating that the feature is not available.

Correction:

If you have a customer that is experiencing this concern, please advise the dealer not to replace or attempt reprogramming of any of the modules on the vehicle.

Advise the customer that a software update is planned for an Over-The-Air update in the near future to remove the redundant message
