

STAR ONLINE PUBLICATION

Case Number: S2308000057

Release Date: April 2023

Symptom/Vehicle Issue: Tire Pressure Monitor (TPM) Display Shows “- -” In Red At Start Up.

Customer Complaint/Technician Observation: Technician finds no diagnostic trouble codes (DTCs) are set. Owner may mention condition happens on short trips after a sleep cycle.

Discussion: If the vehicle has DTCs, follow the code diagnostics published in service information. This document applies to vehicles without DTCs, exhibiting red dashes “- -” for tire pressures at start up. Also, after the vehicle is driven for 1-2 minutes the TPM display updates and shows accurate pressure data. If the vehicle meets this criteria, do not replace the Radio Frequency Hub (RFH) or TPM parts. Engineering is currently investigating this condition. A future service publication will announce a resolution.

This document does not authorize warranty repairs. This communication documents a record of past experiences. STAR Online does not provide any conclusions about what is wrong with the vehicle. Rather, it captures all previous cases known that appear to be similar or related to the vehicle symptom / condition. You are the expert, and you are responsible for deciding on the appropriate course of action.

Contact STAR Center, or your Technical Assistance Center Via TechConnect, eCONTACT or Service Library entry if no solution is found.
