

## 93 Electric drive motor/power electronics condensation inside cover 93 23 07 2070348/1 May 16, 2023.

Model(s)	Year	VIN Range	Vehicle-Specific Equipment
e-tron quattro	2019 – 2023	All	Not Applicable
e-tron Sportback quattro	2020 – 2023		
e-tron s quattro	2022 – 2023		

## Condition

### Customer states:

There is no customer statement. This condition is found during repairs for other concerns.

### Workshop findings:

Condensation is found on the cover for power electronics connections in the electric drive motor (Figure 1).

**Figure 1.** Condensation on the cover of power electronics connections.

## Technical Background

The condensation appears due to temperature differences and humidity. If the concern is only condensation, this will not lead to further issues.

## Production Solution

Not Applicable

## Service

Do not perform additional repairs if water condensation is detected on the inside of the cover for power electronics connection to the motor.

It is important to check that there is no coolant in the area around the bolts. If there is coolant in the connection area this TSB does not apply and this condition will require diagnosis.

## Warranty

This TSB is informational only and not applicable to any Audi warranty.

## Additional Information

All part and service references provided in this TSB (**2070348**) are subject to change and/or removal. Always check with your Parts Department and/or ETKA for the latest information and parts bulletins. Please check the Repair Manual for fasteners, bolts, nuts, and screws that require replacement during the repair.
