Bronco - Equipped With 2 Tops - Rear Trim Cover Does Not Sit Flush With Soft Top Roof Installed

Some 2023 Bronco vehicles equipped with 2 tops (soft top and hard top roofs) from the factory may exhibit interior rear trim covers (service base 7831289/7831288) that do not sit flush when the soft top roof is installed. This may be due to the vehicle coming with trim covers designed for use with hard top roofs only. Refer to the vehicle's window sticker to verify if vehicle was equipped from the factory with the 2 top option. For vehicles that meet this criteria, provide the customer with a left and right interior rear trim covers that will sit flush with both roof options. Order and provide to the customer service part numbers M2DZ-7831289-BA (left) and M2DZ-7831288-BA (right).
