

Subject		Market
Mongoose MFC3 Cable - Door Panel Interference		USA
Service Category	Section	
Power Source/Network	Networking	
Applicability		
2022-2023 GR86		

APPLICABLE VEHICLES

2022-2023

86

CONDITION

When using a Mongoose MFC3 cable to connect for diagnostics to the DLC connector on current generation GR86, the cable may contact the driver's door panel when closed. Please see attached photos for an example of this condition. It is recommended that an ADVi unit be used for diagnostics or the driver's door remain open if using a Mongoose MFC3, to prevent any damage to the DLC connector, cable, or door panel.

RECOMMENDATIONS

Please utilize the ADVi unit for diagnostic work or leave the driver's door open when using the Mongoose MFC3 on all 22-23MY GR86 vehicles.
