

Due to strong demand and order intake for our Saf-T-Liner HDX and EFX products, we have now fully utilized the available 2024 production slots. As a result, we will close the order book for these vehicles effective today, June 23, 2023, at 5pm PST, suspending order intake at this time. We continue to further define the parameters of the production ramp down of these products. Dealers should reach out directly to your Regional Sales Manager regarding additional order requests for any potential production capacity that may become available.

The production ramp up of our new Saf-T-Liner HDX2 and EFX2 at our High Point, NC South Campus facility is currently being established. When our type D product order book is reopened at a future date to be determined, those orders will be for these new vehicles.
